

GUIDE: How to remove the light from the **Met ELFO, GENIO & CRACKERJACK** model helmets.

REQUIREMENT CHANGE DATE: Under no circumstance can these model helmets be sold with the light and battery included after the **June 21ST 2022** standards changeover date.

Any further questions please don't hesitate to contact us – **1300 361 686**

1) Remove helmet from carton & protective bag.

Be careful not to place the helmet on a surface that may scratch or damage it.

2) Open the retention dial cap by pulling it outwards, and remove the light cell for disposal.

If it's a tight fit, you may need to use a small flat head screwdriver to gently remove the cap, taking care not to damage it.

3) Remove the battery & dispose of the light cell.

The light cell must not be kept under any circumstances. You may keep the battery for other applications, being sure to follow local storage and handling guidelines. (Contact us if you require assistance disposing of the light)

4) Replace the retention dial cap.

Line up the mounting points and push down firm.

3) Re-pack the helmet for sale.

Put the helmet back into the protective bag with the opening to the back, and back into the box. Make sure to include the user manual on the under side of the helmet, inside the protective bag.

GUIDE: How to remove the light from the **Met IDOLO & CROSSOVER** model helmets.

REQUIREMENT CHANGE DATE: Under no circumstance can these model helmets be sold with the light and battery included after the **June 21ST 2022** standards changeover date.
